

Evaluation of measurement results and comments on digital education

in April 2020

	1.	2.	3.	4.	5.	6.	Total result
hungarian program	3,55	3,96	3,97	3,32	3,76	text answers	3,71
english program	3,30	3,54	3,61	2,97	3,51	text answers	3,39

Questions:

1. How satisfied are you with the organization of the digital education?
2. How satisfied are you with the teaching materials provided on the e-learning system?
3. How satisfied are you with the work of the teachers?
4. To what extent do you feel, that the acquirement of the knowledge needed for your progress is ensured within the framework of the digital education?
5. To what extent can the courses be completed based on the tasks received in the e-learning system?
6. Which course/courses did you experience to have an essential problem?

Evaluate text responses:

During the measurement in April 2020, there were 100 responses in the Hungarian program, which means a response of 28.7% in terms of the total number of students. Among the responses received, in 24 cases, students indicated a problem with a course that was related to an educational unit or course. Complaints were received for the courses in question due to the on-line teaching aid, the lack of feedback on student project work and the regularity and technical quality of the webinars.

During the measurement in April 2020, there were 33 responses in the English-language course, which means a 19% response rate in terms of the total number of students. Among the responses, we received 13 negative comments, which mostly
